Languages

TypeScript/JavaScript, Kotlin, C#

Backend Frameworks

Node.js, Spring, .NET Core, GraphQL

Frontend Frameworks

React, Angular

Databases

PostgreSQL, DynamoDB, MongoDB, CosmosDB

Work Experience

Toast

Senior Software Engineer

Remote

October 2022-June 2025

- Led initiatives to streamline third-party integration workflows, which reduced the time to integrate from **30 days** to under **7 days**.
- Developed and maintained an application that allowed configuration per ordering channel and received over **1 million requests per day**.
- Led architecture and delivery of data pipelines and visualization dashboards to benchmark onboarding success metrics, enabling the team to identify bottlenecks and plan future work.
- Designed and implemented scalable backend microservices in **Kotlin** and modern frontend interfaces in **React** and **TypeScript**, using **GraphQL** for efficient client-server communication in **AWS** using **DynamoDB** and **PostgreSQL** for persistence.

MURAL

Senior Software Engineer

Remote

March 2022-July 2022

- Designed and implemented a webhooks platform to enable real-time integrations between MURAL and external tools like Slack and Microsoft Teams, enhancing collaborative workflows for enterprise users.
- Built scalable, event-driven services using **Node.js**, **Express**, **TypeScript**, **Docker**, **Redis**, and **MongoDB** in **Azure**.

Andromeda Systems Inc.

Senior Software Developer

Remote

August 2019-March 2022

- Led a team of 5 engineers in the design and delivery of an inventory tracking system for the F-35 Jet Program/U.S. Department of Defense, ensuring compliance with security and reliability standards.
- Built and maintained internal shared UI libraries to standardize UX across outward-facing applications.
- Architected and implemented backend services in **.NET Core** and frontend interfaces in **Angular** and **TypeScript**, using **SQL Server** for persistence.

Thinkful Inc.

Remote

Part-time Mentor

July 2019-July 2021

- Mentored over 20 students in Thinkful's full stack web development curriculum, covering **JavaScript**, **Node.js**, **PostgreSQL**, **React**, **HTML/CSS**, and computer science fundamentals.
- Reinforced foundational concepts through **paired programming** and project-based learning; provided code reviews, architectural guidance, and best practices around testing and deployment.

Acosta

Jacksonville, FL

Software Engineer I/II

March 2017-August 2019

- Contributed to the transformation of a monolithic retail execution platform into a modern **microservices architecture** using **Azure Functions**, **CosmosDB**, and serverless patterns.
- Built and deployed frontend prototypes using **Vue.js** and assisted in modernizing legacy systems.
- Created proof-of-concept cross-platform mobile application in **Xamarin**, demonstrating improved data entry workflows for field representatives.

Education

Bachelor of Science in Computer Science

University of Central Florida
